

1. To run the source code, download Ubuntu first.
2. In Ubuntu, open the terminal and copy this command “`sudo apt update; sudo apt install apache2 mariadb-server-10.6 php8.1 libapache2-mod-php php8.1-mysql`” to install LAMP stack.
3. Open browser, type <http://localhost/> in search bar and find the source code file.

Once click the file, you can now use the Chatbase.
